

Statement of Future Plan

6 April 2015

Name in full: Joohyun Yang

Date of birth: 15 November 1996

I will come back to Korea for pursuing my career after complete bachelor degree course at OOO College. The purpose I am studying in Swiss is because the current culinary industry demands the person who has fluent knowledge and experience from overseas. It can't be specially emphasized enough that language ability is getting more important. Now I am expecting that I can learn English as well as French and German.

We'll have more and more tourist from foreign countries. Many more international forums are being held in Korea. In consequence of this atmosphere, the more capable human resources are prospected to come out. It's simple and natural for the students who took education to understand easily foreign tourists' nation, culture, life and language.

Basically, I will build up my career and experience in restaurant in Korea. After that, I might run my own restaurant. My plan is to develop the food many people from all other different countries. I will have them learn Korean by adding Korean flavor in my food. I am intending to create unique food style for my own restaurant. Hopefully it can be a next modern style of Korean food.

For the last, I would like to say that the life not taking care of people around me is invalid. Food is love. I will always try to share my cuts with other people who are suffered from difficulties and continue social contribution activity for everybody's healthy life.

Joohyun Yang
